If you are unable to use your digital signature on the EPF employer portal, then read this carefully to know how to effectively use digital signature for PF. So you can easily approve kyC details of your employees. Java releases updates regularly, and whenever Java releases an update, you'll be redirected to the Java Update page. There you can download and install the latest version of Java. But here the problem is even that employers are updating the latest version of Java so far they are not able to approve KYC with DSC. The problem here is not java, it's with the browser you use. Java is the computer programming language needed to run some programs. So it's always best to install the latest version of Java. Browsers are required for EPF DSC If you are a Chrome user, then you need to install a version of Google Chrome less than 42, if you are a user of Mozilla Firefox, then you need to install the Firefox 48 version. If you use other versions, they don't support Java and you'll get the following errros. We found that you use Google Chrome and may not be able to use the Java plugin from this browser. Starting with version 42 (released in April 2015), Chrome has disabled the standard way to support browser plug-ins you can watch it in the images below. For Chrome users Suppose if you use Google Chrome version 48, then I will find this message the same will happen in the case of Firefox as well. If you're using the lower versions of Chrome or Firefox, then you don't see the message above, let's say if you're using Firefox version 48, then Java page update will appear like this. So if you're looking for what version of Java is required for an EPF digital signature, the answer is you always need to update the latest version of Java. Java currently has version 8 of Update 181, which was released on July 17, 2018. EPFO digital signature Java version is free to download So finally if you want to use a digital signature to approve KYC employees without any problems, then you should have the following system requirements. ⬜ system for EPFO Digital Signature Active Digital Signature Certificate Mozilla Firefox version 48 / Google Chrome version below 42.Latest Java update, now version 8, update 181. Learn more How to find out the Google Chrome browser version: Go to the Chrome browser settings or click Alt-F and click on help, and now click on Google Chrome to find out a version of your Chrome browser. How to find out the version of the browser Mozilla Firefox: Click Alt and F, now the menu opens, now go to help and click on about Firefox there you can find a version of your browser Firefox. ⬇ Mozilla Firefox Version 48 Know how to downgrade the Firefox version if you run into any difficulty to install. Or run DSC (Digital Signature Certificate) in epfo (Employee Support Fund Organization). This We usually use to sign a PDF file generated on this site itself. Website Gets Gets redirected to install Java. As we can see, this is not the only problem with Java. All web browsers are now more secure, which no longer allow third-party plugins. So the Java bug's epfo portal coming. System Requirements for DSC on the EPFO website: You need to install an old version web browser like Firefox 43.0.02 and IE11. After a long RDD for this problem we finally got a solution with the next combination download the old version of Firefox Archive and Java Check Java Version compatibility Open Firefox open Google and type Check Java Version the next screen to get appeared. This was a show in my own Windows 10 machine that wasn't going to support Java Plugin anymore. Chrome / New Microsoft Edge Step to include DSC for the EPFO Step 1 website. Go to the control panel and look for the Java icon and go to the system to list sites. The full URL //www.unifiedportal-emp.epfindia.gov.in/epfo/Now applied and the button is normal. Step 2 Open Firefox Browser Close all updates for future stability for the epfo website. Open the menu and go to the options. Then open the extended - update in remove check from automatic installation updates. and check Never check updates. How do I stop Firefox updates? Now your browser won't get automatic updates. In the future, you don't need to reconfigure and process all these steps. Step 3 Open URL in Firefox and enter the user ID and password as provided in your organization. Choose a transaction where you want to make a digital signature. In our case, we use this for THE MEMBER - APPROVE KYC PENDING FOR DS. And there we found a long list of pending requests and click on the DS KYC. The first screen will appear this way. The second screen inside the box asks to include Java plugins. You have to turn on and remember forever the option. Click in minus the symbol allow Java plug-in At the last, the screen gets appeared click on the go. After checking the boxes to remember this deal in the future. Now, after a while, the next PDF SIGNATURE screen will appear. Select Signature and enter the DSC password. Conclusion: This website uses Java plugins to access DSC. All the latest updated web browsers don't allow Java plugins directly. So this article will help you until the website is updated.
