Exampro is a bank of questions containing thousands of questions about Science GCSE and A-level exams, as well as more than 900 KS3 questions. New questions are added regularly. Finding Filter matters quickly and easily using a search tool. Create Drag Matters in your new document. Share Exports in PDF, Word or Cloud, or share via web link. With Exampro, the score is an impact and time is well spent. Highlights are an interactive tool that allows teachers to learn how ASA issues are marked. It provides examples of real answers and explains why these responses received - or lost - signs. Compare View different levels of answer to the same question. Choose Use the highlights to select different aspects of the answers to past ASA questions. Focus on areas that received student signs or where and why the student lost the signs then view the summary comment to understand the general judgment of the examiner. Understand is ideal for CPD and classroom use. MERIT is free for all ASA centers. It's a reporting tool to use with your ASA layouts. Easy to use, type tags using a simple MERIT interface or a spreadsheet download. Automated Reports Identify the strengths and weaknesses of your students through individual, group, and cohort reports. Population comparison See how your students relate to other schools that passed the same tests at the same time. This information will be available as soon as enough data is entered.
